

LANmark-6 Patchcords

- Complies with the latest Category 6 standards
- Uses Nexans cable technology
- Fully matched with other components for maximum performance
- Unscreened & Screened or Ultim
- LSZH Flame retardant jacket as standard

Description

Application

LANmark-6 patchcords can be used to deliver a full end-to-end Class E solution.

LANmark-6 Ultim cords offer superior performance and deliver an additional 6dB channel ACR headroom. They can also be used for accurate field testing of channel performance. They provide improved data throughput and allows for the inclusion of a cross-connect or Consolidation Points for maximum system flexibility. They will also maximise the lifetime and long term performance of the system by minimising the risk of wear & tear damage which can be caused by using non-matched cords

- High Speed Multimedia patchcords

Installation

- Small cross section allows neat installation and simplifies the creation of bundles in cabinets.
- A Low Smoke Halogen Free - Flame Retardant jacket is standard.
- 1, 2, 3 and 5m are standard lengths, other lengths are available on demand.
- 15 m is standard length for single end patchcord. Other lengths are available on demand.
- Orange and dark grey are standard.
- Rugged construction.

LANmark-6 Ultim
