

# Symantec™ Protection Suite Small Business Edition

Fastest, most effective security and recovery priced for small business

## Data Sheet: Endpoint Security

### Overview

Symantec™ Protection Suite Small Business Edition combines the fastest,<sup>1</sup> most effective<sup>2</sup> desktop security with recovery and spam-blocking Microsoft® Exchange email security—all priced for small business. The patented technology of Symantec Insight™ tracks billions of files from millions of systems that identify new threats as they are created. Maximize your employees' productivity by blocking 99 percent of spam.<sup>3</sup> Save time and get superior data protection with automatic security with event-triggered backups or recover entire Microsoft Windows® desktops completely in minutes. Simple central management enables fast, automated protection, and recovery.

### Symantec™ Protection Suite Small Business Edition

**Comprehensive Protection**—Symantec blocks the most threats with patented Insight technology, stops 99 percent of spam, and is the only vendor to combine desktop security, email security, and data recovery into a single suite—allowing you to focus on growing your business.

**Fastest Security**—Symantec™ Endpoint Protection is ranked number one overall against competitors with fastest on-demand and scheduled scans and can recover entire Windows desktops completely in minutes to ensure your business data and resources are available.

**Priced for Small Business**—Save up to 72 percent on licensing costs alone with Protection Suite Small Business Edition, simplify security and data recovery with a single number for support, and get superior protection with automatic security event-triggered backups—to help lower total cost of ownership (TCO) and maximum productivity.<sup>4</sup>

### Advanced protection for computers, laptops, and email

Secure your business information, users, and systems against today's complex malware and spam threats and maximize productivity with the least-intrusive, fastest endpoint security, industry-leading email security, and the ability to rapidly recover

data or computers in the event of system loss or disaster in minutes.<sup>5</sup> Our Global Intelligence Network gives Symantec unmatched insight into today's threats, providing superior security, and easy management—all designed for small businesses.

### **Comprehensive Protection**

#### *Confidence to run your Internet-connected business*

Protection Suite is simple to install and manage with built-in wizards to get your business protected quickly without special training. Remove waste, costs, and complexity of managing multi-vendor solutions and standardize to a single vendor for security and data recovery, blocking spam and email threats. Now have a single client for antivirus, antispymware, desktop firewall, and intrusion prevention. With preconfigured settings and automated reports, you'll have confidence that your business' systems are protected, reducing management costs and complexity—all with no security expertise required.

- **The world leader in security**—Identifying new threats as they are created, Symantec tracks security reputation of over 2 billion files from millions of users world-wide.<sup>6</sup>
- **Protect and grow your business**—Use the fastest and most effective endpoint security and stop 99 percent of spam to maximize your employee's productivity and remove the burden of distracting, unwanted email.
- **Reliable, automated data recovery**—Easily restore entire Windows systems to minimize downtime and get your computer back up and running in minutes, not hours or days.

### **Fastest Security**

#### *Performance so fast your users won't know it's there*

Separating safe files from those at risk turbo charges performance for faster, fewer, smarter scans to maximize productivity by protecting your computers from threats with the least-intrusive, fastest endpoint security today. Protection Suite extends its system protection to include system recovery for Windows-based desktops and laptops, enabling businesses to recover from system loss or disasters in minutes.

- **Best for overall performance**—In recent independent tests, Protection Suite Small Business Edition was rated the best for overall performance among solutions.
- **Invisible protection**—Eliminates up to 70 percent of scan overhead with Insight technology—security so fast your users will notice the difference.
- **Recover data in seconds**—Recovers entire Windows desktops completely in minutes, even to dissimilar hardware.

### **Priced for Small Business**

#### *Affordable security designed for businesses with limited IT staff*

Protection Suite Small Business Edition is a cost-efficient way to get the security and recovery technologies needed to safely run your Internet-connected business. Reduce upfront and on-going computing costs by forcing out complexity—Symantec technologies are centrally or remotely managed and work seamlessly together. You can save up to 72 percent on licensing costs alone and help lower your TCO by simplifying your security and data recovery with a single number for support.

<sup>6</sup>. Gartner Magic Quadrants - Magic Quadrant for Secure E-Mail Gateways, Gartner 2010 and Magic Quadrant for Endpoint Protection Platforms, Gartner, 2010.

- **Save time and money**—Call a single number for support and get superior data protection with automatic security event-triggered backups.
- **Centralize security**—Protect desktops/laptops, Macs®, and email servers with simple management enabling easy, fast, automated protection and data recovery.
- **Switch to a Symantec**—Purchasing desktop security, email security, and recovery separately or from multiple vendors is costly but switching to Protection Suite Small Business Edition can save you up to 72 percent.

### **Key features and benefits**

#### *Only Protection Suite Small Business Edition:*

- Combines security for desktops/laptops/servers, email, and data recovery from the most-trusted security and data recovery vendor.
- Includes Insight technology which uses the malware writer's greatest strength, the ability to create millions of unique threats, against them.
- Provides comprehensive security and data recovery with up to 72 percent savings from buying separately or from multiple vendors.

### **Fastest Endpoint Security**

#### *Effective protection from viruses, malware, spyware, and new threats*

- **Insight technology**—Separates files at risk from those that are safe, for faster and more accurate malware detection, blocking more threats, including mutating and zero-day.
- **Antivirus and antispyware for Windows and Mac**—Provides unmatched malware protection, market-leading antivirus and spyware protection, new rootkit protection, reduced memory footprint, and blazing performance.
- **Network threat protection**—Blocks malware with a rules-based firewall engine and Generic Exploit Blocking (GEB) before it can enter a system.
- **Proactive threat protection**—Detects new and rapidly mutating malware that stops malicious behavior, including new and previously unknown threats with Insight and SONAR 3.
- **Single endpoint agent and management console**—Manage all antivirus, antispyware, desktop firewall, intrusion prevention, application control, and network access control all in a single agent, by a single management console.

### **Effective Email Security**

#### *Block 99 percent of spam and protect emails in Exchange*

- **Antispam and messaging security protection**—Blocks more than 99 percent of unwanted spam with Symantec™ Mail Security, making it one of the industry's most accurate solutions.
- **Safeguard sensitive information**—Filters inbound and outbound emails and ensures that private information stays private.

- **Real-time reporting**—Provides dynamic analytics and reporting, gaining visibility into email usage and growth patterns.

### System Recovery for Windows Desktops

*Efficiently manage, monitor, and recover systems from backups*

- **Ensure systems are available**—Have confidence that your computers and business information are protected against new threats through automated, event-driven backups.
- **Rapid, reliable system recovery**—Enables organizations to run backups automatically when the Symantec™ ThreatCon level changes, and you can recover complete Windows systems in minutes to dissimilar hardware or virtual environments.
- **Minimize downtime**—Get your business systems back up and running quickly by restoring from both event-driven and scheduled recovery points.
- **Restore Anyware technology**—Restores a system to the same or dissimilar hardware, making it easy to restore a system in a remote location without physically visiting the system.
- **Recover Exchange or SharePoint® files**—Recovers Exchange emails or SharePoint documents in seconds.

---

### What's new?

**Insight**—Uses reputation security technology that tracks billions of files from millions of systems to identify new threats as they are created. To learn more, [click here](#).

**Browser Intrusion Prevention**—Effectively blocks attacks directed at browser vulnerabilities.

**Endpoint Protection for Mac OS® X**—Managed through the Endpoint Protection management console.

**Symantec™ Power Eraser**—Powerful tool for removing malware on heavily infected systems.

**Smart Scheduler**—Stays out of your way by performing security tasks when your computer is idle.
